Areas of Expertise

JavaScript (ES6+)
Vue.js 3 / Nuxt
HTML5 & CSS3 / Tailwind CSS
Bootstrap
Android Studio & APK Publishing
Git & GitHub
RESTful APIs & JSON
Responsive Web Design

Professional Summary

Frontend Developer skilled in building modern, responsive web applications with Vue.js 3, Nuxt, Tailwind CSS, and Bootstrap. Experienced in publishing Android applications and 2D games on the Myket store using Android Studio, covering the full cycle from development to APK signing and deployment. Strong foundation in JavaScript, REST API integration, Git/GitHub workflows, and technical SEO. Passionate about clean code, pixel-perfect UI, and continuous self-learning across web and mobile platforms.

Projects & Practical Experience

Frontend Developer, Freelance / Independent Projects, Fars - Karzin

- Engineered and published functional Android applications and interactive 2D games on Myket store using Android Studio, handling end-to-end APK signing, testing, and production deployment.
- Developed "Monox", a responsive clothing e-commerce web platform built with Vue.js 3, Nuxt, and Bootstrap, featuring structured category filtering and dynamic catalog rendering.
- Designed and implemented full-text content-rich websites and a mobile calculator app, emphasizing UI/UX consistency, edge-case validation, and multi-device responsiveness.
- Built a modern interactive personal developer portfolio utilizing HTML5 Canvas particle systems, Tailwind CSS, and automated GitHub Pages CI/CD.
- Demonstrated strong core algorithmic problem-solving and software lifecycle comprehension across both web and mobile environments.

Education

Computer Engineering, Payame Noor University, Qir

Focused on software engineering principles, data structures, algorithms, and web application development.
